## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, 6, and 8-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Smedley, U.S. Patent # 5,559,467.

Figs. 5 and 9 of Smedley disclose circuits comprising: In Fig. 9, a power supply port (port at Vac, Vs); a bridge circuit with at least one pair of switches (transistors 40, 42, see spec. col. 6, lines 37-39); and a ripple suppression circuit (82) for suppressing voltage ripples in a supply voltage supplied to the bridge circuit with at least one pair of switches via the voltage supply port; wherein the ripple suppression circuit is arranged between the power supply port and the bridge circuit with at least one pair of switches (see spec. col. 4, lines 1-16, col. 6, lines 3-67, col. 7, lines 35-40, and col. 8, lines 5-30).

Claims 1-3 and 8-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Stanley, U.S. Patent # 5,513,094.

Fig. 2 of Stanley discloses a circuit comprising: a power supply port (port at 201, +Vcc, -Vcc); a bridge circuit with at least one pair of switches (203); and a ripple suppression circuit (202) for suppressing voltage ripples in a supply voltage supplied to

the bridge circuit with at least one pair of switches via the voltage supply port; wherein the ripple suppression circuit is arranged between the power supply port and the bridge circuit with at least one pair of switches.

***Allowable Subject Matter***

Claims 5 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents # 6,028,476 and # 6,646,506 B1 contain some limitations of the claimed invention.
